ROBOTHON ROBOTICS WORKSHOP

What is Robotics Club?

Robotics Club is a student-led community that brings together technology enthusiasts to learn, build, and innovate in robotics and automation through hands-on projects, workshops, and competitions. It helps members develop practical skills, creativity, and teamwork.

Why should you register for this workshop?

- **Hands-on Learning:** Gain practical experience by building and programming real robotic systems.
- **Beginner Friendly:** Designed for students with little to no prior robotics knowledge.
- **Industry-Relevant Skills:** Learn concepts like sensors, actuators, automation, and basic programming used in modern industries.
- **Certificate of Participation:** Earn recognition for your technical learning and involvement.

What Participants Learn

Module 1: Introduction to Arduino

Module 2: Arduino Hardware Basics

Module 3: Arduino IDE & Programming Basics

Module 4: Sensors for Robotics

Module 5: Actuators – Motors & Control

Module 6: Building Bot

Post-Workshop Robotics Challenge

After the workshop, put your learning to the test in an exciting hands-on robotics competition!

Participants will be given a riddle based on concepts covered during the workshop. Solve the riddle to identify the required components, design the circuit diagram, and build a working circuit within the given time.
